- Companionship
- Transportation services

Why Hire a Home Health Agency?
Assisting Hands is a full service home health agency which screens, hires and trains its employees ensuring that you will have quality home care you can trust. When you hire an independent caregiver or utilize a nurse registry, you become the employer and are fully responsible for the caregiver/employee.

The checklist below details some of the things you should consider before making this important decision.

Mission Statement

To offer our clients personalized non-medical support services in their homes, assisting the elderly, disabled, and others needing assistance to maintain quality of life. Our services support the individual’s choices and preferences in order to preserve their dignity and independence. We assist clients in a spirit of concern for their welfare, gaining satisfaction and a sense of pride for the value that we add to their lives.

Our Core Purpose

To provide a coordinated team approach to therapeutic and rehabilitative health care services utilizing nursing, home health aides, medical social services, physical, occupational and speech therapy, ensuring the continuity of care for patients and clients.

Specialized Services

- Caring for Alzheimer’s and Dementia patients
- Rehab, Recovery and Post-Surgical care
- Caring for Parkinson’s patients
- Palliative and End-of-Life Procedures
- Cancer Patient Care
- People with Disabilities and Chronic Diseases

Care Coordination & Case Management

Our main objective is to facilitate collaboration and care coordination across the continuum of care from outpatient and inpatient to community, clinic, and home. Having assistance in coordinating your care plan can be an enormous relief when you face recovery from illness, chronic health issues, or are finding living at home more difficult than it used to be. We offer expert advice and help to construct a care plan suited to your needs, and individual matching of skilled and reliable caregivers.

We incorporate all the orders and recommendations from your physicians, case managers, healthcare providers and our own initial assessment in order to develop an effective Plan of Care. This plan will describe all the services required, the proposed frequency, cost of each service, potential equipment and supplies needed along with the possible payment sources.

We will also assist in coordinating and referring other services that might be required:

- Durable Medical Equipment
- Medication Management
- Home Modifications
- Medical Alert System
- Community Based Programs
- Transportation Services
- Coordinating Doctor’s Appointments
- Coordinating Physical & Occupational Therapy

Transitional Care

Close to 20% of patients are readmitted to the hospital within 30 days of discharge; most of these readmissions are avoidable. Assisting Hands Home Care can help you reduce the risk of re-hospitalization by coordinating your transition from the Hospital or Rehab facility to your Home. Our Safe Transition-to-Home package includes any of the following:

- Clear communication of discharge orders to patient and family
- Pick you up at the facility and take you home
- Get an appointment with your Physician and labs or tests within 7 days of your discharge
- Pick up any prescriptions
- Fax your discharge orders and new prescriptions to your Primary Care Physician
- Remind you when to take medications
- Coordinate delivery of any Durable Medical Equipment
- Help you set up your home to make it a safe environment
- Clean up your refrigerator and buy any groceries you may need
- Prepare meals with special attention to dietary instructions
- Help with light housekeeping, laundry and errands
- Help you with bathing, dressing and other activities of daily living
