

Assisting Hands Clients
are talking...

"Wonderful caregivers for my mom.

They helped her with everything she needed and also gave her the opportunity to stay in her home longer! The staff was always helpful with scheduling, questions, concerns and anything to meet her needs."

- Cindy Doyle, Daughter

"The aides that cared for my mother are TOP NOTCH! They had the utmost respect for my Mom, and the caregiver team became a part of our family. Knowing you were taking care of Mom allowed all of my siblings to sleep well at night. Keep up the great work!"

Tom Pernik, Son

Meet the Owners
Greg & Kim Kling

We experienced family caregiving first-hand. When Kim's mother, Aggie, was diagnosed with cancer, she moved in with us and Kim became her primary caregiver. We couldn't do everything Aggie required. We didn't have the skills, and with children at home, we didn't have the time to properly care for her.

We were very grateful to find caring aides to help us with Aggie's basic daily needs. This practical relief from caregiving gave Kim the space needed to be her mother's daughter and allowed our family to spend quality time together during her last few months.

When we decided to start our business, Aggie was our inspiration. We knew there were thousands of families just like ours – just like yours – who need the compassionate support well-trained Home Care Professionals can give.
